Executive Summary

Justo is redefining the real estate experience by integrating property discovery, engagement, and conversion into one seamless ecosystem.

AUUM Channel Partner Operating System is designed to modernize and streamline real estate channel partner operations through an integrated digital platform.

The platform combines project discovery, lead management, partner collaboration, and sales tracking into a single ecosystem that enables developers and channel partners to manage the entire sales lifecycle efficiently.

Powered by Agentic AI “Shanaya” (Arvo.ai), the platform enables in-app intelligent actions such as creating leads, updating sales stages, scheduling site visits, and retrieving project information through natural voice or text commands.

By integrating AI automation, CRM workflows, and partner management tools, AUUM replaces fragmented manual processes with a unified operational platform that improves transparency, coordination, and decision-making across the partner network.

Expected Outcomes

- 30–40% faster lead conversion
- 20% reduction in lead conflicts
- 3x channel partner engagement
- automated site visit scheduling
- AI-assisted sales workflows

Through this platform, AUUM delivers a modern PropTech operating system that empowers sales teams and channel partners to operate more effectively while supporting scalable business growth.

Business Impact

The AUUM **Channel Partner Operating System** enables developers and channel partners to move from fragmented sales processes to a unified AI-driven platform that improves operational efficiency, marketing performance, and revenue visibility across the property sales lifecycle.

By combining lead management, partner collaboration, marketing automation, and AI-assisted workflows, the platform helps real estate organizations scale their channel partner ecosystem while maintaining full transparency and control over customer engagement.

Expected Business Outcomes

Improved Lead Conversion

Structured lead tracking and AI-assisted follow-ups help increase lead-to-booking conversion rates.

Higher Channel Partner Engagement

Dedicated CP tools, branded experiences, and marketing control improve partner participation and performance.

Operational Efficiency

Automated workflows for lead management, site visits, and communications reduce manual coordination across teams.

Marketing Performance Visibility

Integrated campaign dashboards provide real-time insights into marketing channels, lead sources, and ROI

AI-Driven Sales Execution

Agentic AI assistant "Shanaya" enables agents to perform sales tasks instantly through voice or text commands.

Strategic Value

- Faster lead response and follow-up cycles
- Reduced lead conflicts between internal sales and channel partners
- Scalable partner ecosystem management
- Data-driven decision making across marketing and sales
- Improved customer journey from discovery to booking

Outcome:

A unified PropTech operating system that transforms traditional channel partner sales into an AI-assisted, data-driven real estate commerce platform.

Key Features

Channel Partner OS

PLATFORMS PVT. LTD.

CP Centric Branding

CP Centric Branding

Each Channel Partner can customize branding directly from their portal.

CP Customized Branding Management

Every referred lead is directed to a CP-branded web app, receiving personalized messages automatically forwarded to the payment portal with pre-filled lead information.

Lead Specific Messaging

Each lead will receive personalized messaging from the Channel Partner and will be automatically forwarded to the payment portal with pre-filled lead details.

Sales Activity Overview

Provides a quick view of upcoming meetings, follow-ups, and site visits to help channel partners stay organized and manage customer interactions efficiently.

Lead & Conversion Insights

Displays key metrics such as new leads, follow-ups, site visits completed, bookings, and lost opportunities to track overall sales performance.

Lead Source Analytics

Breakdown of lead sources such as Facebook, Google, and property portals, enabling partners to understand which channels generate the most qualified leads.

Shanaya: Agentic AI Assistant

Conversational Task Execution

Agents can interact with Shanaya through voice or text to perform actions such as creating leads, scheduling site visits, and updating customer details.

Smart Activity Reminders

The AI assistant can trigger reminders for calls, meetings, and follow-ups, helping agents stay on top of customer interactions.

AI Assisted Sales Workflow

Shanaya connects directly with CRM modules to execute sales actions instantly without navigating multiple screens.

Channel Partner & Technical Architecture

AUUM — Channel Partner Operating System

Multi-Tenant · AI-Powered · Real Estate CRM for Channel Partners

SYSTEM DESIGN

System-Level Architecture — AUUM CP OS

Multi-tenant, AI-first Channel Partner Operating System. Built around the AIUM AI Stack, a multi-module AUUM Stack API, async event/job layer, and a security-governed data layer.

AI AGENTIC PIPELINE (AIUM STACK)

STEP 01

Input

Voice (STT) or Text command from CP Agent via Mobile App

STEP 02

Intent Detection

NLP model classifies intent: `schedule_visit`, `update_lead`, `raise_booking`, etc.

STEP 03

Entity Extraction

Extract: lead name, project, date/time, amount, disposition from utterance

STEP 04

Action Generation

Clarify ambiguity → generate structured `ActionPayload` → execute via REST API

CLIENTS — PRESENTATION LAYER

CP Mobile App

React Native (iOS & Android)

Org Admin Portal

React.js + Next.js (Web)

Customer Microsite

Next.js SSR (per project)

Event Log Outbox

Kafka / DB outbox – async, site logs

Audit Event Log

Append-only store – audit trail, site logs

Calling & Telephony Module

Integration: Exotel / Twilio / Ozonetel

Auto-logging: Call records auto-created with lead linkage

Transcription: STT post-call async transcription job

Disposition: Agent marks outcome post-call

Click-to-call: One-tap dial from lead screen

Recording: Stored in S3 with access control

Analytics: Call counts, durations, conversion rates

Infra & Observability

Deployment: Docker + Kubernetes (EKS)

CI/CD: GitHub Actions → ECR → EKS

API: Node.js / Fastify microservices

Monitoring: Prometheus + Grafana dashboards

Logging: ELK Stack (structured JSON logs)

Tracing: OpenTelemetry + Jaeger

Alerts: PagerDuty on SLO breaches

AI-Powered CHANNEL PARTNER MANAGEMENT PLATFORM

Platform: Android & IOS Mobile Applications

AI Engine: Agentic AI Assistant “Shanaya” powered by Arvo.ai

Proposal and commercials

Phase 1

**Core CP platform, AI
assistant, mobile apps**

Comprehensive Feature Breakdown

Phase 1 Breakdown

Development Timeline: 18 Weeks

Feature	Description	Feature Breakdown	Pricing
Channel Partner Mobile Application (Android & iOS)	Cross-platform mobile application enabling channel partners to browse projects, submit leads, track bookings and interact with sales teams.	• OTP Login & Secure Authentication • Project Discovery & Search • Submit & Track Leads • Project Media & Brochure Access • Favorite & Share Projects • Push Notifications • Lead Status Updates • In-App Activity Tracking	₹14,00,000
Project & Property Management System	Centralized system for managing real estate project inventory, pricing, media and marketing assets accessible to channel partners.	• Project Catalog Management • Unit Inventory Management • Pricing & Offer Configuration • Brochure / Media Upload • Advanced Search & Filtering • Project Sharing Links	₹8,50,000
Lead Management & Sales Pipeline CRM	CRM module to track customer leads from inquiry stage to booking closure.	• Lead Creation & Capture • Lead Assignment to Sales Agents • Lead Funnel Stages (Fresh → Booked) • Lead Transfer & Reassignment • Lead Activity Timeline • Lead Source Tracking	₹9,00,000

Comprehensive Feature Breakdown

Phase 1 Breakdown

Development Timeline: 18 Weeks

Feature	Description	Feature Breakdown	Pricing
Lead Locking & Conflict Prevention Engine	System to prevent conflicts between internal sales and channel partners.	• Direct vs CP Lead Identification • Phone Number Locking • Duplicate Lead Detection • Lead Ownership Management • Full Lead Audit Trail	₹5,50,000
Channel Partner Registration & Management Connecting via existing CRM	Connecting to Existing Platform to onboard and manage brokers and sub-brokers within the ecosystem.	• Integration with existing Channel Partner Admin / CRM system • CP Registration & Profile Synchronization • Bulk Import of Channel Partners • Relationship Manager Assignment & Mapping	₹7,00,000
Site Visit Digitization System	Digitization of customer site visits and visitor verification processes.	• Site Visit Scheduling • QR / OTP Visitor Check-In • Walk-In Visitor Registration • Visit Tracking & Logs • Visit Feedback Capture	₹4,50,000
Integrated Communication Suite	Built-in communication tools enabling agents and channel partners to interact with customers directly from the platform.	• Integrated Dialer • Call Logging & History • SMS Notifications • Push Notifications • Email Alerts	₹4,00,000

Comprehensive Feature Breakdown

Phase 1 Breakdown

Development Timeline: 18 Weeks

Feature	Description	Feature Breakdown	Pricing
Admin & Operations Web Portal	Web-based admin dashboard to manage platform operations and monitor performance.	• Role-Based Access Control • User & Team Management • Project Configuration • Lead Monitoring Dashboard • System Configuration	₹5,50,000
Agentic AI Assistant – “Shanaya” (Powered by Arvo.ai)	AI-powered assistant integrated into the mobile app enabling agents and channel partners to perform actions through voice or text commands using agentic workflows.	• Voice / Text Command Interface • Intent Detection & Entity Extraction • AI-Driven Action Execution (create lead, schedule visit, update status) • Conversational Clarification Engine • AI Activity Logging & Audit Trail • Integration with Lead, Project and Visit Modules	₹5,50,000
Cloud Infrastructure & DevOps Setup	Backend infrastructure, deployment pipelines and cloud hosting architecture to ensure scalability and security.	• Cloud Infrastructure Setup • Containerized Deployment • Database Configuration • CI/CD Pipeline Setup • Monitoring & Logging	₹4,50,000

Comprehensive Feature Breakdown

Phase 1 Breakdown

Development Timeline: 18 Weeks

Feature	Description	Feature Breakdown	Pricing
Security & Compliance Framework	Security architecture ensuring data protection and secure platform operations.	• Data Encryption • Secure Authentication Layer • Access Control Policies • Audit Logs & Activity Monitoring	₹2,00,000
Subtotal			₹65,00,000

PLATFORMS PVT. LTD.

Phase 2

**Marketplace, marketing
platform, analytics,
workforce tools**

Phase 2 Feature List

AI-Powered Channel Partner Platform Expansion

Brokerage & Commission Management System

- Brokerage rule engine per project
- Commission calculation engine
- Invoice generation (GST)
- CP payout lifecycle tracking

Sales Team & Workforce Intelligence Platform

- Team hierarchy management
- Lead assignment / target mgmt
- Real-time field tracking
- Visit logs

Telecaller Operations Module

- Telecaller lead queues
- Call outcome tracking
- Lead qualification / assignments
- Lead analytics

Role-Based Access Control System

- Admin / Telecaller / Mktg / Sales / CP Manager
- Role dashboard & templates
- Feature-level permission control
- User audit logs

AI-Driven Campaign Builder & Lead Retargeting Engine

- Auto-create campaigns
- Re-engag lost leads using AI caling & remarketing ads
- Campaign optimization

Marketing Automation & Ads-as-a-Service Platform

- Auto-create + optimize marketing campaigns
- Campaign ROI tracking
- Facebook / Google integrations
- Integrated advertising budget intelligence

Channel Partner Lead Marketplace

- Lead distribution to channel partners
- Partner eligibility filtering
- Demand analytics / rules

Channel Partner Microsite Platform

- CP branded mini-sites
- Lead capture forms
- Online project catalogs
- Microsite analytics

Channel Partner Lead Marketplace

- Lead distribution to channel partners
- Partner eligibility filtering
- Demand analytics / rules

Customer Auto-Discovery & Contact Intelligence Engine

- Automatic identification & enrichment
- Duplicate detection
- Lead profile auto-completion

Telephony & Call Intelligence Platform

- Integrated call masking & recording
- AI voice transcription
- Call analytics for agents / callers

Analytics & Business Intelligence Platform

- Revenue funnel dashboards
- Marketing ROI reports
- Partner & team performance analytics

Comprehensive Feature Breakdown

Theme: Phase 2

Development Timeline: 24 weeks

Feature	Description	Feature Breakdown	Pricing
Brokerage & Commission Management System	Transparent brokerage lifecycle management enabling developers and channel partners to track commissions and payouts across the booking lifecycle.	• Brokerage rule engine per project • Commission calculation engine • Invoice generation with GST compliance • CP payout lifecycle tracking • Financial audit logs	₹11,54,700
Sales Team & Workforce Intelligence Platform	Management system allowing team leaders and admins to monitor sales teams, assign leads and track field activities.	• Team hierarchy management (Admin → Manager → Agent) • Lead assignment to team members • Agent target management • Real-time geo-location tracking • Field visit activity logs	₹9,31,200
Role-Based Access Control System	Enterprise permission framework ensuring each role only accesses relevant modules within the platform.	• Role templates (Admin / Telecaller / Marketing / Sales / CP Manager) • Permission dashboard • Feature-level access control • User activity audit logs	₹6,37,500

Comprehensive Feature Breakdown

Theme: Phase 2

Development Timeline: 24 weeks

Feature	Description	Feature Breakdown	Pricing
Telecaller Operations Module	Dedicated workflow system for tele-calling teams handling inbound and outbound leads.	• Telecaller lead queues • Call outcome tracking - Lead qualification workflows • Follow-up scheduling • Call activity analytics	₹6,82,400
Marketing Automation & Ads-as-a-Service Platform	Platform enabling developers to launch automated marketing campaigns across multiple channels.	• Facebook & Google ad integrations • Campaign creation dashboard • Marketing budget allocation • ROI prediction engine • Campaign performance dashboards	₹8,46,800
AI-Driven Campaign Builder & Lead Retargeting Engine	AI system that automatically creates marketing campaigns and retargets lost leads using AI calling and remarketing ads.	• Auto-generation of marketing campaigns • AI campaign optimization • Lost lead retargeting workflows • AI voice calling for remarketing • Ad retargeting integrations	₹7,95,300

Comprehensive Feature Breakdown

Theme: Phase 2

Development Timeline: 24 weeks

Feature	Description	Feature Breakdown	Pricing
Channel Partner Microsite Platform	Personalized microsites for channel partners to promote projects and capture leads.	• CP branded microsites • Lead capture forms • Project catalog pages • Referral tracking links • Microsite analytics	₹7,28,900
Customer Auto-Discovery & Contact Intelligence Engine	Data enrichment module that automatically identifies and enriches customer data when leads enter the system.	• Auto identification of customer name and phone number • Contact enrichment APIs • Duplicate lead detection • Lead profile auto completion	₹5,93,400
Telephony & Call Intelligence Platform	Integrated calling infrastructure enabling agents and telecallers to communicate with customers directly through the platform.	• Call masking integration • Call recording storage • AI call transcription Click-to-call functionality • Call analytics dashboards	₹6,76,900
Advanced Communication Automation	Multi-channel communication automation platform for customer engagement.	• WhatsApp messaging integration • SMS automation workflows • Email automation • Push notification campaigns • Follow-up automation sequences	₹6,14,200

Comprehensive Feature Breakdown

Theme: Phase 2

Development Timeline: 24 weeks

Feature	Description	Feature Breakdown	Pricing
Analytics & Business Intelligence Platform	Reporting system enabling management to track marketing, sales and partner performance.	• Sales funnel analytics • Channel partner • performance dashboards • Marketing ROI reporting • Conversion analytics • Revenue insights	₹6,91,400
Infrastructure Scaling & Observability	Enhancements for scaling the platform to large real estate networks and monitoring system health.	• Monitoring dashboards • Distributed logging • Performance optimization • System alerting configuration	₹2,16,600
Subtotal			₹80,41,900

Implementation Roadmap

A Two-Phase Plan to Deliver the **AUUM Channel Partner Operating System**

Delivering a **Unified AI-Driven Real Estate Partner Ecosystem**

Phase 1 — Core Platform Deployment

18 Weeks

-  Channel Partner Mobile Apps (Android & iOS)
-  Lead Management & Sales CRM
-  Channel Partner Management Platform
-  Site Visit Digitization System (QR/OTP)
-  **Agentic AI Assistant** - Shanaya (Arvo.ai)
-  Communication Infrastructure (Call, SMS, Push)
-  Admin & Operations Portal
-  Cloud & Security Infrastructure
-  Cloud & Security Infrastructure

Focus: Core CP Platform with AI Workflows

Phase 2 — Platform Expansion & Marketing Automation

24 Weeks

-  Brokerage & Commission Management System
-  Sales Team & Workforce Intelligence
-  Telecaller Operations Module
-  Marketing Automation & Ads-as-a-Service
-  AI Campaign Builder & Retargeting Engine
-  Channel Partner Microsites
-  Customer Auto-Discovery & Contact Intelligence
-  Telephony & Call Intelligence Platform
-  Analytics & Business Intelligence
-  Infrastructure Scaling & Observability

Focus: Marketing, Analytics & Growth Ecosystem

Final Implementation Outcome

**AI-Driven
Partner
Ecosystem**

**Lead-to-Booking
Sales
Automation**

**Marketing
Automation &
Campaign Intelligence**

**Scalable Partner
Growth
Infrastructure**

**Real-Time
Analytics & ROI
Dashboards**

Total Project Timeline: | **42 Weeks** | Timeline: **42 Weeks**

Legal Terms & Conditions

- **Scope of Work**

- This engagement covers the end-to-end design, development, deployment, and maintenance of the digital enablement suite as outlined in the proposal, including web application, AI automation layers, CRM integration, and marketing analytics modules. Any additional features or integrations beyond those mentioned shall be considered out of scope and billed separately upon written approval from the client.

- **Delivery Timeline**

- The project will be delivered in phased milestones as specified in the proposal. Each milestone will be reviewed and approved before moving to the next stage. Timelines are indicative and may vary based on the client's feedback, dependency approvals, or third-party API responses.

- **Payment Terms:**

- Advance: 40% of total project value at signing of agreement and project initiation.
- Milestone-based: 50% in proportion to milestone completion and sign-off.
- Final: 10% upon delivery and client acceptance of the final system.
- All invoices are payable within 15 days of issue. Late payments may attract 1.5% monthly interest or statutory permissible rate.
- All amounts are exclusive of GST, which shall be levied as applicable.

- **Recurring & Cloud Costs**

- Recurring charges for WhatsApp Business API, AI Voice minutes, hosting, AWS infrastructure, or third-party services (as listed in the proposal) will be billed monthly on actual usage or the agreed minimum commitment, whichever is higher. Failure to make timely recurring payments may lead to temporary service suspension without liability to AUUM Platforms.

Legal Terms & Conditions

- **Intellectual Property (IP) Rights**

- All software code, scripts, AI models, designs, and technical components created specifically for the client will be transferred under a non-exclusive, perpetual usage license after full payment.
- However, proprietary frameworks, prebuilt modules, or AI training datasets used in development will remain the intellectual property of AUUM Platforms.
- The client may use, host, and modify the deployed system but cannot resell, sublicense, or reproduce AUUM proprietary components without written consent.

- **Testing, Acceptance & Warranty:**

- Upon milestone delivery, the client shall conduct User Acceptance Testing (UAT) within 7 days. If no written feedback is received, the deliverable will be deemed accepted.
- A 30-day post-deployment support window will be provided to address any bugs or performance issues. Enhancements or new requests beyond that window will be billed separately.

- **Liability & Indemnity:**

- AUUM Platforms shall not be liable for any indirect, consequential, or incidental losses arising from the use or performance of the delivered system. Liability, if any, shall be limited to the total fees paid under this engagement. The client agrees to indemnify AUUM against any claims arising from third-party data misuse, improper content upload, or regulatory non-compliance related to their own use of the system.

- **Data Security & Compliance**

- All customer data will be stored and processed on secure, encrypted servers (AWS or equivalent). AUUM Platforms will ensure compliance with Indian IT Act, 2000, and applicable data privacy regulations. The client is responsible for adhering to end-user consent, advertising standards, and KYC data handling norms for their customers.

Legal Terms & Conditions

- **Maintenance and Support**

- Post-deployment, AUUM shall provide optional maintenance packages for uptime management, API upgrades, and technical support. Any additional integrations, module extensions, or platform scaling requirements will be treated as a new scope of work.

:

- **Termination**

- Either party may terminate this agreement with 30 days written notice if the other fails to perform obligations and does not cure such breach within that period.
- Upon termination, all dues till the termination date must be cleared, and AUUM shall hand over all completed deliverables and documentation.

- **Dispute Resolution & Governing Law:**

- This agreement shall be governed by and construed in accordance with the laws of India. Any dispute arising out of this engagement shall be resolved through arbitration in Bhubaneswar, Odisha, under the Arbitration and Conciliation Act, 1996. The decision of the arbitrator shall be final and binding on both parties.

- **Acceptance**

- Signing or digital acknowledgment of this proposal shall constitute full acceptance of these Terms & Conditions and authorization to commence the project under the agreed scope.

We sincerely thank the Justo leadership and team for the opportunity to collaborate on this transformative digital journey.

At **AUUM Platforms**, we believe in building more than technology — we build scalable digital ecosystems. Our goal is to empower Justo with an intelligent, scalable, and future-ready digital platform that redefines how modern buyers experience real estate.

We're excited about the potential of this partnership and confident that together we can set a new benchmark for AI-driven property engagement and customer experience in India.

We look forward to your approval and to beginning this journey together.

Warm regards,

Tapaswin Padhy
