

STATEMENT OF WORK

This Statement of Work is created in accordance with the discussions with **Justo** (“Customer”) having its registered address at: _____ and Indexnine Technologies Pvt. Ltd. (“Consultant”) having registered address at Sadanand Business Center, 12th floor, Pashan highway side road, Mahalunge, Pune, Maharashtra 411045, for the first phase of building a real estate CRM platform with effective date of **15th May 2025**.

Background and Objective of the Program

The customer is a leading prop-tech company revolutionising the real estate market. With a presence in multiple cities, Customer provides integrated solutions for real estate developers that will help leverage technology to enhance efficiency, customer experience, and transparency.

The objective of the program is to develop, implement, and maintain a scalable, secure, and modular technology platform aligned with customer’s vision of redefining real estate operations. This statement of work is for the first phase of the program.

The primary objectives of this project are:

- Operational Excellence: Improve workflows through automation and seamless integrations.
- Customer Centricity: Enhance onboarding, user interactions, and transparency via digital tools.
- Scalability: Build a robust platform capable of supporting long-term growth
- High reliability and responsiveness : Ensures adoption by various customers
- Data Security: Ensure data integrity and compliance with industry regulations.

Scope

Module	Sub-module	Interface
Application code scaffolding	BE application code setup	
	FE application code setup	
	Mobile app code setup	
	FE Theming setup	
	FE Common components setup	
	i18n setup	
	Authentication setup: Login with email and 2 factor SMS authentication	
Infrastructure setup	Repo setup	
	CICD Pipeline setup	
	Database setup	
	Deployment infrastructure setup	
	Domain setup	

Role-based access control (RBAC) Management	Project-specific user management	Web
	Team & Hierarchy setup per project	Web
User management	Users CRUD	Web
	User project, Role, etc... association	Web
Pre-sales Management	Lead – CRUD	Web
	Lead Scoring: - Score updation in workflow management - UX for Score representation	Web
	Campaign CRUD apis without any external service integration Campaign & Source as picklist fields Used on Leads and Opportunities	Web
	Lead Pipeline Management	Web
	Email (Mailgun) SMS (Pinnacle) WhatsApp (Interakt) CTI Integration: CTI (mCube/MyOperator) - Incoming call pop-up - New lead creation on unknown call - Call recordings linkable to leads - Integration with mCube or MyOperator"	Web
	Email, SMS & WA templates with variable replacement	Web
Communication channels management	Lead Gen Connectors: Integration and API support 99acres, Magicbricks, Housing.com Google & Facebook Lead Forms API support for external lead creation	Web
	Lead Forms	Web
Bulk Marketing	Bulk Select Leads to update field (ex. change owner) or send email, SMS, WA	Web
Availability/Shift Management	CRUD	Web
Goal Tracking	CRUD	Web
Channel Partner Management	Tagging of CP on lead Just a picklist fed from the CP data table	Web
	CRUD APIs - CP with 1 contact only	Web
	API - Expose api to External service integration for Leads & Opportunities	Web
	Audits logs: Audit Trail log on Lead & Deal	Web
Common Core	Import & Export data: Standard formats for Leads	Web
	Listings, Search & Smart lists: Condition based Search Segmentation lists Smart list (Save the search as smart list and use in future)	Web
Task management	Tasks – CRUD	Web
	Tasks assignment and tracking	Web
Shift Management/ Availability Management	Weekly availability preferences affecting routing along with assignment to users	Web

J Verse Integration/ Sales Flow	SV is scheduled to send a webhook to J Verse. Get an API call from there if SV is conducted/ not conducted, with a note to update the lead	
Notifications	All notifications on the web: New Lead Lead assigned to me Reminder - SV, Task Incoming Call Call Disposition	Web

Non-Functional Requirements

1. Responsive Web UI, Tablet-friendly
2. Cloud-agnostic (prefer AWS for initial deployment)
3. Observability (logging, metrics)
4. Performance Testing
5. Security testing
6. REST Standard - Level 2
7. Sonarqube - Code quality, vulnerability, code smells.

Note: NFR like Performance testing, Scalability, Availability, Concurrency, Reliability will be discussed and agreed mutually in the Discovery and Design Phase

Hypercare will be provided for 30 days post go live R1 or 45 days from UAT sign off whichever is earlier. Hypercare period is to fix any bugs and to provide support to end users to help them to adopt the system. Changes if any in this period will be treated as change requests

Assumptions

- The following technology stack is considered for the estimation.
 - Frontend: ReactJS
 - Backend: NestJS framework, Node.js
 - Mobile: Flutter/Reactive Native
 - Database: MongoDB/Postgres
 - Infrastructure: AWS (CloudFront, EC2/EKS, VPC, Route53), Terraform for IaC
 - DevOps: CI/CD pipelines, containerized deployments (Docker/Kubernetes)
- Development & Deployment methodology

The platform will be used by a single tenant only. Hence multi-tenancy is not considered in any of the layers like - Infrastructude, WEB Application BE Application, Mobile Application, Database, White labeling and any other multi-tenancy feature.
- Authentication setup

The authentication feature will not have any external services integrated like social login using gmail or facebook, it will use JWT header based authentication. The OTP will be sent via SMS and Email using the communication channels that the platform will have integrated.
Hence, SSO, Social Login, oAuth or any other external service integration is out of scope.
- Campaign Tagging
 - Campaign & Source as picklist fields
 - Used on Leads and Opportunities

It is assumed that launching, running and administration of a campaign is out of the scope of this phase. The lead management screen will have a drop down to capture the campaign name and

source as pick list fields to be manually selected at the time of creation of new lead/part of the data feed for bulk uploads.

- **Label / Locale Management (I18n)**

The data will be stored and displayed only in English. The static content on the web pages can be in multilingual format. Indexnine will produce a mapping file of English-Other language for verification by Justo.

- **Users management**

The platform will manage the users internally and there will be no external identity providers or services integrated for any user management operations.

- **API support for external lead creation**

The authorization mechanism for the external services will be JWT based and there will be no client management on GUI. We will need more details on external services integrations.

- **Communication Templates**

The template will be of Email, SMS, WA and it will also belong to either Lead, SV, Call. Templates will not have UI in this phase, only the backend operations will be provided.

- **Pipeline Management**

No UI needed. By default, have one pipeline and attach it to all leads. Any changes will be label or metadata related and can be done from the backend.

- **Import & Export**

Only the CSV file type is considered.

- **Existing data migration**

Any existing data migrating into the new platform is out of scope in this phase.

- **Other Key Assumptions**

- Client will provide timely access to key stakeholders for interviews and feedback
- Client will provide necessary access to third-party systems for integration
- Client will assign a dedicated project coordinator for day-to-day communication
- Client will allocate resources for user acceptance testing
- The scope of requirements will remain stable throughout the development phases
- Any changes to requirements will be managed through a formal change control process
- Client will provide the necessary brand guidelines and content for the user interface
- Client will be responsible for any third-party subscription costs (Mailgun, Pinnacle, etc.)
- Client will provide necessary infrastructure access for deployment

Dependencies

- The customer stakeholders will be available for discovery and design sessions
- The customer will make all the necessary infrastructure available

Indicative Timeline

Indicative timeline for Phase 1 is as follows.

Phases	M1	M2	M3	M4	M5
Discovery, UX + VD					
Architecture Design					
Application scaffolding					

Authentication, RBAC					
User CRUD, User project Role					
Pre-sales Tech: Lead CRUD, Lead Scoring, Campaign CRUD, Campaign and Source as picklist fields, Email(mailgun), SMS(Pinnacle), Whatsapp(Interakt), CTI integration					
Common Core: Export & Import, smart list, standard formats for leads, condition based search, segmentation lists					
Communication Channels: Lead gen connectors(99acres, magicbricks, housing.com), Shift management CRUD, Goal tracking CRUD, Channel partner management: CRUD APIs, Tasks CRUD, Notifications on WEB for new lead, lead assignment, reminder, incoming call, call disposition					
UAT, Performance				UAT	
Go Live				R1	
Hypercare					

Deliverables

Deliverables for Phase 1 are as follows.

- Features as per scope defined above
- Application architecture documentation
- Training Material
- Implementation documentation

Success criteria

1. Discovery and design phase

Consultant will commence the project with a Discovery and Design phase.

Following the discovery phase, Consultant will execute a two-iteration design process:

- **First Iteration Deliverables:**
 - Initial wireframes for system workflows
 - Preliminary clickable prototype demonstrating key user journeys
 - Customer will review and provide consolidated feedback within 5 business days
- **Second Iteration Deliverables:**
 - Refined wireframes incorporating stakeholder feedback
 - Enhanced clickable prototype with improved user experience elements
 - Final documentation of design decisions and rationale
 - Customer commits to reviewing and providing final sign-off within 5 business days of receiving the completed wireframes and clickable prototype

Any iterations beyond this will be treated as a change request.

2. Build and Go Live

Indexnine will deliver the product based on the signed off requirements, wireframes from design phase. Customer will conduct UAT before release. The acceptance will be based on following

- The signed off functionality post discovery and design phase will be the basis for UAT and final sign off
- The system successfully integrates with all specified third-party services
- All specified user roles and permissions function as required
- All documentation has been delivered and approved
- User training has been completed
- No critical or high-priority bugs remain unresolved

Any changes to requirements will be managed through a formal change control process

Use of AI co-pilots

The Consultant will utilize Cursor.ai or equivalent, an industry standard tool, to aid its consultants in activities related to the project. The consultant will validate the AI output to ensure quality and accuracy of the deliverables. The consultant will enable “Privacy” mode in the tool to ensure none of customer code or data will be stored or used for training purposes by the tool.

Change Management

The Current estimates and timelines have been provided based on the scope mentioned in the scope section. If there is any change in scope or impact of dependencies, the timeline may get extended.

At the start of the engagement, a change management board including the Key stakeholders from both parties will be formed. Any change in scope, timelines etc will be formulated as a change request and will be reviewed and approved by the change board.

Communications

Regular team meetings will be scheduled throughout the engagement to review timelines, scope of work, and deliverables. Team meetings will be remote using web conferencing tools or face-to-face, as necessary.

Below is a table of the key stakeholders on this engagement. Additional stakeholders may be identified during the course of the engagement.

Key Stakeholders	Company
Atul Mathur	Indexnine Technologies Pvt. Ltd.
Vinayak Joshi	Indexnine Technologies Pvt. Ltd.

Consulting Fees and Expenses

The consulting fee for above scope is as follows: INR 90 lacs + GST with deferred payment option.

Deferred Payment Option:

The construct of the deferred payment option is as follows:

- INR 10 lacs payable per month for 6 months
- Balance amount of INR 30 lacs payable by the end of month 10

As a special case, and in the interest of the larger relationship, Indexnine is offering to absorb the extra financing and administrative costs related to the deferred payment.

The deferred payment amount would need to be covered through a bank Guarantee/ Post Dated Cheque / Corporate guarantee as mutually agreed

Invoice and Payment Schedule

Invoices will be raised at 30 days interval for first six months. One final invoice will be raised at the end of 10th month.

Payment shall be made within 30 days of the invoice being raised.

Acceptance and Authorization

IN WITNESS, WHEREOF, the parties hereto each acting with proper authority have executed this Statement of Work.

Terms and Conditions

Validity of Proposal

This proposal will remain valid for acceptance for a period of 10 days from the date of the proposal.

Language for Communication

The official language for communications on this assignment will be English.

Proposal Acceptance

As the first step for the assignment, the customer will sign-off the proposal/SOW as confirmation of its acceptance.

Lead Time

The consultant will start work on the assignment upon receiving the signed proposal or on the mutually agreed engagement commencement date.

Project Location

The engagement will be carried out from the Consultant office in Pune, India. India's public calendar will be followed.

Outstation Arrangements

For project-related activities to be carried out at locations other than those mentioned under Project Location herein, Customer will arrange for and bear all expenses, direct and indirect, towards all cost items including transportation, lodging and boarding of the Consultant, wherever applicable.

At their discretion, the Consultant may make any or all of the necessary arrangements relating to the above-mentioned deputation. In such cases, the Customer will promptly arrange to reimburse the Consultant for the expenses incurred on actuals.

Project Execution Infrastructure

The customer will provide necessary and adequate hardware infrastructure and data connectivity for services to be consumed by the Consultant to fulfill his commitment for the assignment and will be arranged for and provided at no cost to the Consultant.

Intellectual Property Rights (IPR)

All intellectual property owned by Consultant shall remain the sole and exclusive property of Consultant and all intellectual property owned by Customer and its affiliates shall remain the sole and exclusive property of Customer.

Confidentiality

All information which has or will come into possession or knowledge of each party about the other party's business including without limitation customers, business plans, business operations, processes, working methods, standards and technical information during the course of this Agreement which is designated as Confidential shall be treated by the other party as being confidential to the other party. Each party shall protect such information from unauthorized use, disclosure or reproduction in a manner consistent with the measures the other uses to protect its own confidential information. Disclosure of such information to third parties will only be with the prior written consent of the other party. Each party agrees that such information will only be made available to those employees of such party whose function requires it in connection with the provision of services under this Agreement and agrees to take all requisite steps to ensure that such employees observe the obligations of confidentiality set out herein.

The obligations of confidentiality imposed by this section shall survive the variation, termination or expiry of this Agreement but shall not apply to information or data which:
at the time it is received is part of the public domain
subsequently becomes part of the public domain through no fault of the recipient
is lawfully received by the recipient from a third party or
which is already known to the recipient prior to disclosure

Relation between the Parties

The relationship between Consultant and Customer is solely that of an independent contractor and no employer-employee, principal-agent, partnership, or joint venture relationship is deemed to have been created between the Parties.

Security

Consultant shall ensure that he shall comply with all rules, regulations, and bylaws, orders and any directions issued by Customer in force in relation to any premises at which the Services are to be provided.

Liability

In no event shall the Consultant or Customer be liable, one to the other, for special, indirect, consequential or any other damages in connection with or arising out of the furnishing, performance or use of the services provided by Consultant under the terms of this proposal. The liability of either party shall be limited to instances where the damage or loss to a party was caused by the negligence or wilful acts or omissions of the other.

Indemnity

The Parties shall indemnify and hold harmless one another from and against all Claims that may be initiated whether based on tort or contract that may be incurred or sustained as a consequence of a Party's:

- a. willful misconduct, negligence, fraud, misrepresentation, or breach of its obligations under the Agreement;
- b. breach of any of its representations and warranties under this Agreement; or
- c. violation or non-compliance with any Applicable Laws.

Notwithstanding anything contained in this Agreement, the maximum liability of either party shall be the lesser amount of the following two: (a) the actual loss or damage incurred by the Company or the third party; or (b) the 200% of the total Fee paid under this Agreement.

Additional Support and Services

In case the Customer either requires additional assistance for the execution of its tasks in respect of the assignment, the Consultant may undertake to provide such assistance or support under a separate arrangement. Such arrangement will be independent of this proposal and will be covered through a separate proposal.

Force Majeure

If the performance as specified in this proposal is prevented, restricted, delayed or interfered by reason of:

fire, explosion, cyclone, floods

war, revolution, acts of public enemies, blockage or embargo

any law, order, proclamation, ordinance, demand or requirements of any government or authority or representative of any such government, including restrictive trade practices or regulations

strikes, shutdowns or labor disputes which are not instigated for the purpose of avoiding obligations herein or

any other circumstances beyond the control of the party affected, then notwithstanding anything here before contained, the party affected shall be excused from its performance to the extent such performance relates to prevention, restriction, delay or interference, and provided the party so affected, uses its best efforts to remove such causes of non-performance, and when removed the party shall continue performance with the utmost dispatch. The party affected shall notify the other by written notice within seven (7) working days from the occurrence of force majeure event and if the force majeure continues for longer than 30 days from the of such notification, the party not so affected shall be entitled to terminate the agreement, without penalty after giving seven (7) working days' prior notice to the other.

Termination

Consultant and Customer will have the right to terminate the agreement resulting from this proposal by giving a fifteen-days notice to the other upon situations arising due to non-compliance with the stipulations of this proposal.

If Customer issues the termination notice, then it will pay the Consultant all amounts due as of the termination date stated in the notice as well as the payment that would have become due upon completion of the month encompassing the termination date.

Payment Delays

For the period beyond the due date of any invoice, Customer will be liable to the Consultant for an interest of 2 percent per month on the invoice amount. Fractions of a month will be treated as a full month for purposes of interest calculation. Consultant may, at its discretion, decide to discontinue the services either temporarily or permanently in case of non-payment of dues.

Arbitration

In the event of a dispute or difference of any nature whatsoever between Consultant and Customer during the course of the assignment arising as a result of this proposal, the same will be referred for arbitration to a Board of Arbitration. This Board will be constituted prior to the commencement of the arbitration and will comprise two arbitrators and an umpire. Consultant and Customer will each nominate an arbitrator to the Board and these arbitrators will appoint the umpire.

Survival

The obligations of the Parties in clause 'Confidentiality', 'Relationship between the parties', 'Termination', 'Non-employment' and 'Force Majeure' shall to the extent provided, remain in effect after any termination of this proposal.

Waiver, Amendment and Modification

Failure of either Party at any time to require performance of any provisions of this Proposal shall not affect the right to require full performance of the Proposal terms at any time thereafter, and the waiver by any Party of a breach of such provision shall not be taken or held to be a waiver of any subsequent breach or nullification of the effectiveness of such provision. Except as otherwise provided in this proposal, any waiver, amendment or other modification of this proposal will not be effective unless it is in writing and signed by both the parties.
