1. Executive Summary

The proposed solution is a cloud-native, mobile-first, AI-enabled, multi-tenant SaaS platform designed to digitally empower Channel Partners (CPs) across the complete lifecycle—from lead management to brokerage payout tracking. The system is designed using modular microservices, event-driven communication, and governed AI orchestration to ensure scalability, security, compliance, and operational resilience.

- The platform will provide:
- Lead Management
- Site Visit Scheduling
- AI-powered Call Intelligence
- Channel Partner Performance Monitoring
- Commission & Payout Management
- Incentive Tracking
- Analytics & Forecasting
- Developer–Broker Communication Framework
- Uses AI for actionable insights
- The system will serve as a centralized digital ecosystem connecting, Channel Partners, and Sales Agents.

As a technology partner, we would be committed to the complete lifecycle of design and development of software solutions from the initial phase of product definition to create a scalable solution with great user experience. We propose to design and develop a comprehensive and end to end solution with rich features that enhances customer experience to great extent. We deliver user experience by engaging with our customers at chosen stages of the development process, ensuring we create impactful application features that go beyond engineering, to pure craftsmanship.

So far, we have delivered more than 300+ software applications for our customers globally. We have the right set of skills & resources to deliver the quality work as per your requirement.

2. About Triazine

Triazine Software (a CMMi Level 3 certified organization) is one of the class IT Service providers in India, focused on building unmatched experiences for our customers, be it on mobile or desktop. We have a proven track record of delivering multifaceted services to meet our customer's business objectives.

We have been helping startups, small and medium sized businesses (SMB) and large enterprises across the globe transform their businesses leveraging innovative and cutting-edge technologies.

Our technology partnership with various OEMs helps us build enterprise solutions for our clients.

Vision

As a business, we continuously strive to become one of the most preferred and trusted technology partners in providing reliable, scalable and affordable software solutions to our customers being employee friendly at the same time.

Mission

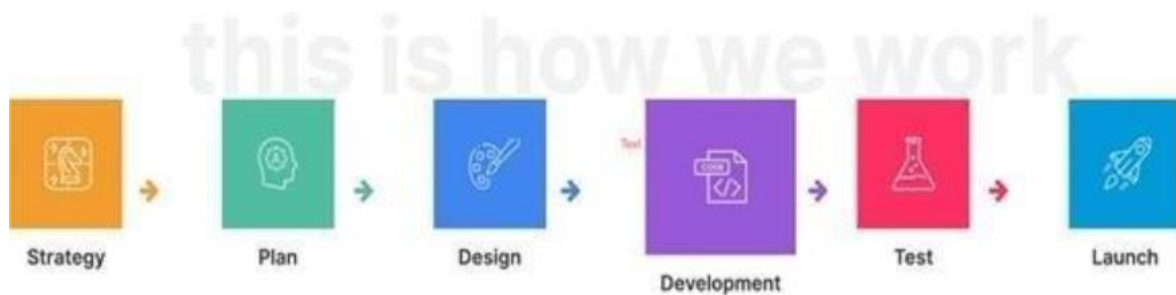

We are committed to deliver quality software leveraging innovative and cutting-edge technologies to our customers across the globe that addresses their business challenges and maximizes the return of their investment. We intend to partner in achieving business growth and success to our customers with the highest level of customer focused services, professionalism, honesty and business integrity.

3. Triazine Software is 'Agile'

We practice AGILE development methodology that has an iterative development approach to identify any gaps in early development and opportunities to address them ensuring greater project success

Agile methodologies embrace iterations. Small teams work together with stakeholders to define quick prototypes, proof of concepts, or other visual means to describe the problem to be solved.

The team defines the requirements for the iteration, develops the code, and defines and runs integrated test scripts, and the users verify the results. Verification occurs much earlier in the development process than it would with waterfall, allowing stakeholders to fine-tune requirements while they're still relatively easy to change.

Meetings & Status Reporting

Throughout the implementation process, maintain open communication channels with client's stakeholder to ensure their feedback is incorporated and their expectations are met.

Regular meetings and demonstrations can help validate progress and ensure alignment with the client's vision.

Escalation Matrix

Sr. No.	Stakeholder	Escalation Level
1	Project Manager	Level 1
2	Account Manager	Level 2
3	Management	Level 3

4. Scope of Work

As per the Functional scope of work mentioned in the RFP shared by Justo Team for Design, Development & Deployment of an AI-Enabled Real Estate Channel Partner Platform

We will provide end-to-end delivery, including:

- Product architecture & solution design
- UI/UX design for CP-first experience
- Mobile application (Android + iOS)
- Web admin & partner portals (where required)
- Backend, APIs, and integrations
- AI & telephony integration
- Security, compliance & audit readiness
- Deployment, training, documentation & support

5. Tech Stack

- Frontend: Angular/ Flutter
- Backend: Python/ .NET
- Database: MySQL
- AI: OpenAI / Azure AI / Custom LLMs
- Telephony: Exotel / Twilio
- Cloud: Azure/AWS

6. Deliverables

- Functional & technical design documents
- UI/UX wireframes & prototypes
- Mobile apps & backend services
- Source code & deployment setup
- API & integration documentation
- Test cases & QA reports
- Training & handover documents

7. Solution Architecture Overview

The platform will be designed using the following principles:

- **API-First Architecture** – All services expose secure, versioned APIs.
- **Microservices-Based Modularity** – Each business domain operates as an independently deployable service.
- **Event-Driven Processing** – Message broker ensures decoupled, resilient communication.
- **Multi-Tenant SaaS Model** – Logical isolation of CP firms within a shared infrastructure.
- **Cloud-Neutral Deployment** – Compatible with public, private, or hybrid cloud environments.
- **Security-by-Design** – Embedded compliance and encryption controls.
- **AI-Native Workflows** – AI embedded directly into lead qualification and automation processes.
- **Offline-Capable Mobile Design** – Supports low-connectivity environments with intelligent sync.

8. High-Level Architecture Layers

Presentation Layer

Web Portal for:

- Admin
- Channel Partner Owner
- Broker/Agent
- Finance Team
- Lead dashboard
- AI call trigger button
- Call history & playback
- Transcript viewer
- Site visit tracking
- Commission dashboard
- AI scoring insights

API Gateway & Security Layer

- OAuth2 / JWT authentication
- Role-based access control
- Tenant isolation
- Secure API management
- Ensures multi-tenant SaaS security.

9. Core Business Microservices

Lead Management Service

- Lead ingestion
- Assignment rules
- Status lifecycle tracking
- Follow-up reminders

Site Visit Service

- Visit scheduling
- Calendar integration
- Visit-to-booking tracking

Commission & Incentive Engine

- Rule configuration
- Slab-based payouts
- Booking validation
- Finance approval workflow

Channel Partner Management

- Broker onboarding
- Project mapping
- KYC & document management

10. Human-Voice AI Calling Engine

While telephony infrastructure supports call routing, recording, masking, IVR, and compliance, it does not provide advanced conversational AI capabilities such as natural dialogue, objection handling, intent detection, lead scoring, or automated site visit scheduling

To achieve full autonomous AI calling capabilities, the following third-party services are recommended:

- Telephony infrastructure— Exotel or Twilio for call routing, recording, masking, and compliance
- Conversational AI Engine: OpenAI (for context-aware dialogue, objection handling, lead scoring, and intent detection)
- Speech-to-Text & Neural Voice: Microsoft Azure Speech Services or Google Speech & Neural Text-to-Speech (for real-time transcription and human-like voice synthesis)

11. Real-Time AI Call Flow

Lead Assigned

AI Call Triggered

Exotel Places Call

Audio Stream Routed to AI Engine

Customer Speaks

Speech-to-Text Converts to Text

OpenAI Generates Context-Aware Reply

Neural TTS Converts Reply to Human-Like Voice

Voice Played Back in Call

Call Recorded

Transcript + AI Summary Stored

Lead Score Updated

Site Visit Suggested / Scheduled

12. AI Intelligence Processing

- After call completion:
- AI processes transcript to generate:
- Budget extraction
- Location preference
- Timeline urgency
- Sentiment score
- Competitor mention detection
- Site visit intent
- Lead classification (Hot/Warm/Cold)
- Follow-up recommendation
- All powered via secure API integration.

13. Data & Storage Layer

- Structured database (Lead, Broker, Commission data)
- Secure object storage (Call recordings)
- Tenant-based data isolation
- Encrypted storage

14. Analytics & Revenue Intelligence

- Admin Dashboard:
- Lead conversion funnel
- Broker performance comparison
- AI-based lead quality index
- Site visit ratio
- Revenue per partner
- Broker Dashboard
 - AI call insights
 - Follow-up alerts
 - Commission earned

15. Commercial

Cost of Project Development – INR 1,80,00,000 + taxes

15.1. Phase-wise cost breakup

- Project Kick-off/Team Alignment: 20%
- SRS and UI/UX Completion: 10%
- On Completion of Development: 30%
- AI Implementation: 20%
- UAT Approval: 20%

15.2. Timeline

Project will be delivered in **8-9 Months** from the date of receiving the PO, A more defined time with phase wise delivery will be shared after the project is awarded.

15.3. Team Structure:

Role	Count
Solution Architect	1
Backend Developers	3
Frontend Developers	2
AI Engineer	2
DevOps Engineer	1
QA Engineers	2
UI/UX Designer	1
Project Manager	1

15.4. Support & AMC pricing

AMC will be charged @ 22% of total project cost with an increment of 10% over the AMC value YOY

Or

we can plan for a retainer model contract to take care of continuous enhancement and support.

15.5. Third-party cost assumptions

Category	Monthly Cost
Server Infrastructure	₹1L – ₹1.5L
Telephony (2000 calls daily, average duration 3 minutes)	₹1.4L – ₹2.2L
AI Services	₹1L – ₹1.5L

16. Terms & Conditions

- All functionality Development activities will not be carried out at the Triazine office.
- Any dependency on the Client must be resolved in a timely manner to avoid delays.
- Any dispute would fall under the jurisdiction of Delhi courts.
- Any cost mentioned above are exclusive of any taxes.
- Proposed Cost mentioned above for the solution is valid for next 45 days from date of submission
- We will provide the one-month free support post go-live to take care of any issues/bugs. Post the standard support period, we can plan for a retainer model or annual maintenance contract to take care of continuous enhancement and support.

17. Out of Scope and Assumptions

Out of Scope

- Cost of server/infra/any 3rd party software or any services like telephony, SMS gateway, email gateway, google maps license etc.
- Onsite Resource Deployment.

Assumptions

1. **Store Account Credentials**

Access to Apple App Store Connect and Google Play Console accounts will be shared, including certificate/provisioning profile permissions.

2. **Environment & API Keys**

All necessary environment variables, API keys, SDK keys and configuration files will be supplied.

3. **Timely Feedback from Client**

Client will provide prompt responses to queries and clarifications within 24–48 hours to avoid delays.

4. **Store Review Timelines Not Controlled**

Apple/Google review durations may vary; our responsibility is limited to preparing and submitting compliant builds.

5. **Test Devices & QA Support**

We will test standard web application in different browsers and Mobile applications on Android and iOS devices, but edge-case device testing is out of scope unless provided by the client.

6. **Third-Party Billing**

Any third-party service billing is the client's responsibility.

7. **Project Start Date Depends on Access**

Project timelines begin only after all necessary accesses and credentials are received.
